- 4. (currently amended) The method of claim 1, which includes the additional step of <u>using the computer to</u> electronically crediting the <u>payment</u> account with the <u>payments</u> payment and to electronically transfer the funds from the payment account to the client substantially immediately.
- 5. (currently amended) The method of claim 1, which includes the additional step of establishing an additional payment account for the customer and associating same the additional payment account with an additional payee client.
- 6. (currently amended) The method of claim 2, which includes the additional step of identifying said <u>payment</u> account solely by the <u>eustomer unique</u> identifier.
- 7. (currently amended) The invention of claim 1, which includes the additional step of using a telephone number associated with the customer as the account identifier. wherein said unique identifier comprises a telephone number associated with the customer.
- 8. (currently amended) The method of claim 1, which includes the additional step of said payment service provider reporting to the elient/payee client activity associated with customers of said elient/payee client.
- 9. (currently amended) The method of claim 1, which includes the additional steps of:
- a) said elient/payee client maintaining a customer database including identifiers for the customers of same the client;
- b) providing information from said customer database to said payment service provider; and

- c) offering said payment services to said customers identified within said customer database.
 - 10. (original) The method of claim 1, which includes the additional steps of:
 - a) said payment service provider maintaining an agent network; and
- b) said customers communicating with said payment service provider through said agent network.
- 11. (currently amended) The method of claim 10, which includes the additional steps of:
- a) enrolling the customers with said payment service provider through said agent network; and
- b) said payment service provider paying a fee to said an agent in the agent network for each of the eustomer customers enrolled thereby by the agent.
- 12. (currently amended) The method of claim 1, which includes the additional step of:
- (a) formatting the <u>a</u> elient's customer database <u>of the client</u> for use by the payment service provider.
- 13. (currently amended) The method of claim 101, which includes the additional steps of:
- a) establishing with said payment service provider an account group comprising the customers of a the client; and
- b) activating individual accounts upon enrollment of the customers of the client.
- 14. (currently amended) The method of claim 1, which includes the additional steps of:
 - a) the client designating multiple products for the payment service;

receipt;

accounts; and

- b) the client designating payment denominations for each of its the designated products;
 - c) establishing payment service provider fees;
- d) inputting pricing bands based on the number of <u>the</u> customers of the client for <u>its</u> the products;
 - e) inputting principle ranges for the products;
 - f) inputting associated fees for the products; and
 - g) setting a variable fee schedule for the payment service provider.
- 15. (currently amended) The method of claim 1, which includes the additional steps of:
- a) printing a receipt for the customer upon receipt of payment from same the customer;
 - b) printing the eustomer's identification unique identifier on the
 - c) designating a service availability value on the receipt; and
- d) printing on the receipt a commercial message from the client to the customer.
 - 16. (original) The method of claim 1, which includes the additional step of:
 - a) printing coupons for use by said customer.
- 17. (currently amended) The method of claim 1, which includes the additional steps of:
 - a) setting criteria for customer eligibility for said payment services
- b) excluding ineligible customers from a database of eligible customers for said payment services accounts.
 - 18. (original) The method of claim 1, which includes the additional step of:

- a) communicating to said customer promotional information from said client.
- 19. (currently amended) The method of claim 1, which includes the additional step of:
- a) communicating to said customer commercial messages from third parties consisting of entities which, wherein said third parties do not compete with the client.
- 20. (currently amended) The method of claim 1, which includes the additional step steps of:
- a) producing a card for said customer including the identifier.

 activating a card for said customer; and
 - b) storing the unique identifier on the card.
- 21. (currently amended) The method of claim 120, which includes the additional step of:
 - a) selectively concealing the <u>unique</u> identifier on the card.
- 22. (original) The method of claim 20, wherein said card comprises one of the group comprising: a credit card; a debit card; and a prepay card.
- 23. (currently amended) The method of claim 1, wherein said <u>unique</u> identifier comprises the customer's driver's license number.
- 24. (original) The method of claim 1, wherein the customer interfaces with the payment service provider by one of a method from among the group consisting of:
 - a) telephone with voice recognition;
 - b) Internet global computer network;
 - c) mail;
 - d) in person;
 - e) e-mail; and

and

- f) point-of-sale (POS) terminal with card reader.
- 25. (original) The method of claim 1, which includes the additional steps of:
- a) the payment service provider tabulating advertising and coupon impressions for the client;
- b) the payment service provider tabulating coupon redemptions for the client;
 - c) the client paying the payment service provider for impressions;
 - d) the client paying the payment service provider for redemptions;
 - e) collecting customer data from coupon redemptions; and
 - f) reporting coupon redemption customer data to the client.
- 26. (currently amended) The method of claim 1, which includes the additional steps of:
 - a) setting an interval for a discounted payment service;
 - b) counting customer payments; and
 - c) discounting a customer payment upon reaching said interval.
 - 27. (original) The method of claim 1, which includes the additional steps of:
- a) displaying a new customer screen upon enrollment of a new customer by said payment service provider;
 - b) capturing enrollment information concerning said new customer;
- c) promoting other services of one of said payment service provider and said client to said customer.
- 28. (currently amended) The method of claim 1, which includes the additional steps of:
 - a) establishing a maximum permissible inactivity period;

- b) logging customer transactions and comparing same to said maximum inactivityperiod inactivity period;
- c) detecting accounts which exceed said maximum allowable inactivity period; and
- d) retiring said accounts which exceed the maximum allowable inactivity period.
- 29. (currently amended) The method of claim 1, which includes the additional steps of:
 - a) tracking customer transaction recurrences;
 - b) monitoring customer retention;
- c) metering future marketing and rebate programs for <u>the</u> client based on transaction recurrences and customer retention; and
- d) the payment service provider providing customer transaction records to the client.
 - 30. (original) The method of claim 1, which includes the additional steps of:
 - a) setting a required number of transactions for rebate with the client;
 - b) counting said transactions with the client; and
- c) rebating the cost of customer cards to the client upon reaching the number of transactions required for rebate eligibility.
- 31. (currently amended) The method of claim 1, which includes the additional steps of:
- a) the payment service provider receiving identification said unique identifier from the customer;
 - b) displaying payment options to the customer;
 - c) the customer selecting a payment method;
 - d) verifying the payment method; and

provider;

on;

and

- e) accepting making the payment according to the selected payment method.
- 32. (currently amended) The method of claim 1, which includes the additional steps of:
 - a) the client identifying multiple products to the payment service
 - b) displaying the multiple client products to a the customer;
 - c) the customer choosing <u>selecting</u> one or more <u>of the</u> products to pay
- d) the customer choosing <u>selecting</u> one or more amounts to pay on the respective selected products; and
 - e) making said eustomer-selected payments on said selected products.
- 33. (currently amended) The method of claim 1, which includes the additional steps of:
 - a) providing client-specific advertising;
 - b) the payment service provider enrolling customers for the client;
- c) the customer and the payment service provider selecting features and pricing offered by the client.
- 34. (currently amended) A payment service method, which includes the steps of:
- a) a payment service provider contracting with a client to provide payment accounts to the client's customers, wherein a customer of the client pays funds into the payment account and uses the funds to purchase goods or services from the client;
- a) b) a the payment service provider receiving a payment from a the customer;

- b) c) the payment-service provider assigning a unique identifier to the customer;
- e) d) the payment service provider receiving payment instructions from the customer;
- d) e) establishing using a computer to establish an the payment account with the payment service provider for the customer, wherein the computer is capable of communicating with a storage medium;
 - <u>f</u>) storing the payment account in the storage medium;
- e) g) crediting the payment account in an amount corresponding to the payment;
 - f) h) transferring the funds from the payment account to a payee of the eustomer and the client of the payment service provider pursuant to the payment instructions from the customer;
 - g) i) maintaining the anonymity of the customer;
- h) j) using the computer to electronically crediting the payment account with the payments payment and to electronically transfer the funds from the payment account to the client substantially immediately; and
 - i) k) identifying the payment account solely by the customer identifier.
 - 35. (currently amended) A payment service system, which includes:
- a) a payment service provider with an agent network, wherein the payment service provider contracts with a client to establish payment accounts for the client's customers and use the agent network to receive payments from the client's customers in order to fund the payment accounts for use by the client's customers to purchase goods or services from the client;
- b) a customer with a unique identifier assigned by the payment service provider; a customer database stored in a storage medium that identifies the client's customers;

- c) a client of the payment service provider and payee of the customer, the client/payee having a customer database; a processor capable of communicating with said storage medium for generating a unique identifier for each of said customers in said customer database;
- d) a eustomer host computer capable of communicating with said storage medium and said processor for establishing a payment account for each of the customers on said customer database and associating said payment account identified by with said unique identifier; and
- e) a remote computer located at a location of an agent in the agent network for processing a transaction with the customer, wherein the customer provides the agent with the unique identifier, a payment, and payment instructions, and the agent enters the unique identifier, amount of the payment and the payment instructions into said computer and the computer communicates the unique identifier, the payment amount and the payment instructions to the host computer;
- e) the payment service provider a software application capable of running on said host computer being adapted to receive the payment instructions from the eustomer remote computer and substantially instantaneously crediting said payment to the eustomer's payment account identified by the unique identifier and transfer the payment from the payment account to an account the customer has with the client pursuant to the payment instructions.

- 36. (new) A payment service method, which comprises the steps of:
- a) a payment service provider contracting with a client to provide payment accounts to the client's customers, wherein a customer of the client pays funds into the payment account and uses the funds to purchase goods or services from the client;
- b) the payment service provider receiving a payment from the customer;
 - c) assigning a unique identifier to the customer;

- d) the payment service provider receiving payment instructions from the customer;
- e) using a computer to establish the payment account and to associate the payment account with the unique identifier, wherein the computer is capable of communicating with a storage medium;
- f) storing the payment account and the unique identifier in the storage medium;
- g) crediting the payment account in an amount corresponding to the payment;
- h) the customer using the unique identifier to access the payment account;
- i) the customer directing the payment service provider to make a payment to the client from the payment account without providing identifying information; and
- j) transferring funds from the payment account to the client pursuant to the payment instructions.
 - 37. (new) A payment service method, which comprises the steps of:
 - a) a payment service provider receiving a payment from a customer;
 - b) generating a unique identifier for the customer;
- c) the payment service provider receiving payment instructions from the customer, wherein said payment instructions identify a payee of the customer and a client of the payment service provider;
- d) using a computer to establish a payment account for the customer, wherein said payment account established by said computer contains said payment instructions and is stored in a storage medium that is capable of communicating with said computer;
- e) entering said unique identifier into said computer and associating said unique identifier with said payment account;
- f) crediting the payment account in an amount corresponding to the payment;

- g) the customer accessing the payment account using the unique identifier;
- h) the customer directing the payment service provider to make a payment in an amount designated by said customer from said payment account without providing identifying information; and
- i) transferring funds from the payment account to the payee/client pursuant to the payment instructions.
- 38. (new) The method of Claim 37, wherein the Customer generates the unique identifier.
 - 39. (new) The method of Claim 38, further comprising
- a) the customer entering the unique identifier into the computer using an input device connected to said computer.
- 40. (new) The method of Claim 37, wherein the identifying information identifies said customer.
- 41. (new) The method of Claim 37, wherein the identifying information identifies an account said customer has with said payee.
 - 42. (new) The method of Claim 37, further comprising:
- a) said customer using an interface to communicate with said payment service provider.
- 43. (new) The method of Claim 37, wherein said interface is a telephone with voice recognition.
- 44. (new) The method of Claim 37, wherein said interface is an Internet global computer network.
- 45. (new) The method of Claim 37, wherein said interface is mail correspondence.
- 46. (new) The method of Claim 37, wherein said customer interfaces in person with said payment service provider.

- 47. (new) The method of Claim 37, wherein said interface is an e-mail system.
- 48. (new) The method of Claim 37, wherein said interface is a point-of-sale (POS) terminal with a card reader.
 - 49. (new) The method of Claim 37, further comprising:
- a) said customer providing said unique identifier to said payment service provider to access said payment account to retrieve information from said payment account, such as said account balance and said payment instructions.
 - 50. (new) The method of Claim 37, further comprising:
- a) said customer providing said unique identifier to said payment service provider to access said account to making additional payments to said account.
 - 51. (new) The method of Claim 37, further comprising:
- a) said customer providing said unique identifier to said payment service provider to access said account to change said payment instructions.
 - 52. (new) A payment service method, comprising:
- a) a payment service provider contracting with a client to provide payment accounts to customers of the client;
- b) a customer making a payment to a service representative of said payment service provider;
 - c) generating a unique identifier for said customer;
- d) said customer providing said service representative with payment instructions, wherein the payment instructions identify a payee of said customer and a client of said payment service provider;
- e) said service representative using a computer to establish a payment account containing said payment instructions and referencing said payment account to said identifier, wherein said computer communicates said account to a host computer operated by said payment service provider that is capable of communicating with a storage medium;
 - f) crediting said account with a monetary value;

- g) storing said account and said unique identifier in said storage medium; and
- g) transferring funds from said account to said payee pursuant to the instructions of said customer.
- 53. (new) The method of Claim 51, wherein said monetary value has the same value as said payment.
- 54. (new) The method of Claim 51, wherein said monetary value is equal to said payment less a service charge payable to said service representative.
 - 55. (new) A payment service system, comprising:
 - a) a processor to process a payment made by the customer
- b) an input device to input information for establishing a payment account, wherein the information comprises the amount of the payment, payment instructions from said customer, and a unique identifier assigned to said customer;
- c) a host computer capable of communicating with said input device for receiving said information;
- d) a first software application capable of running on said host computer to create said payment account for said customer, wherein said payment account contains said payment instructions, has a balance equal to said payment amount, and is associated with said unique identifier;
- e) a storage medium capable of communicating with said host computer for storing said payment account;
- f) an interface through which said customer can communicates with said host computer, accesses said account stored in said storage medium by communicating said unique identifier to said host computer, and initiate payment from the payment account to the payee without providing identifying information; and
- g) a second software application capable of running on said host computer for processing said payment instructions and causing said payment to be made to said payee according to said payment instructions.

- 56. (new) The payment system of Claim 54, wherein the input device is a computer.
- 57. (new) The payment system of Claim 54, wherein the input device is a point-of-sale terminal.
- 58. (new) The payment system of Claim 54, wherein the input device is a computer operated by a service representative of the payment service provider.
- 59. (new) The payment system of Claim 54, wherein the input device is said customer's computer; wherein said customer's computer communicates with said host computer via the Internet.
- 60. (new) The payment system of Claim 55, further comprising a keypad attached to said computer, wherein the customer generates said unique identifier and inputs said unique identifier into said keypad.
- 61. (new) The payment system of Claim 54, wherein said customer accesses the payment account with the unique identifier and directs the host computer through said interface to make a further payment from said payment account to said payee.
- 62. (new) The payment system of Claim 54, wherein said customer accesses the payment account with the unique identifier and adjusts the payment instructions.
- 63. (new) The payment system of Claim 54, wherein said customer accesses the payment account with the unique identifier and makes a new payment to the payment service provider to increase the balance of the payment account.
- 64. (new) The payment system of Claim 54, wherein the interface is a computer operated by said customer communicating with the host computer via the Internet.
- 65. (new) The payment system of Claim 54, wherein the interface is a computer operated by a service representative of said payment service provider communicating with the host computer via a computer network.
- 66. (new) The payment system of Claim 54, wherein the interface is a point-of-sale device.
 - 67. (new) A payment service method, which comprises the steps of:

- a) a payment service provider contracting with a client to provide payment accounts to the client's customers, wherein a customer of the client pays funds into the payment account and uses the funds to purchase goods or services from the client;
- b) a the payment service provider receiving a payment from a the customer;
- c) the payment service provider assigning a unique identifier to the customer;
- d) using a computer to establish the payment account with the payment service provider for the customer and to associate the account with the unique identifier, wherein the computer is capable of communicating with a storage medium;
 - e) storing the payment account in the storage medium;
- f) crediting the payment account in an amount corresponding to the payment;
- g) the customer providing the unique identifier to the client to purchase goods or services; and
- h) the payment service provider transferring the funds from the payment account to the client.
